

Team Retrospective

Overview

Date	May 5, 2026
Team	Dumb Horse 🐎
Participants	@Generic Account @Matthew Gabriel Rada @Ven Corwell @Dylan DelConte

Retrospective

▶ Start doing	● Stop doing	👏 Keep doing
Assigning specific tasks	Jumping around with tasks, and be more systematic	Keep up the good work 👍
Communicating that you don't understand what to do for your assigned task.	Not communicating that you're having trouble and instead give up on completing the task.	Asking teammates for assistance!
Delegate work more effectively	Not communicating what has already been done.	Using the Kanban Board!
Having better time management.	Waiting until the very last minute to start and complete a task.	Completing the assigned task!

For the Dumb Horse Salon code, we will eventually need to implement the following:

- Check for duplicate usernames
- Change how the user password is stored
- Implementation of the Admin class
- The Admin class will be the one to determine the user role
- Implementation of customer rewards

- Create an additional status for Appointment for completed appointments
- If kept as a console program, file reading/writing needs to be implemented for the data
- etc.

Action items

- ☐ Have open floor discussion.
- ☐ Have discussions outside of class
